

Sahand Anvari

Product Designer · Design Systems Lead

Vancouver, BC, Canada · sahandanvari@gmail.com

Product Designer with 5+ years of leadership building and governing multi-brand design systems. I specialize in design tokens, developer-friendly component contracts, and educating teams toward consistent, efficient delivery — most recently making systems AI-ready with machine-readable contracts and agent guardrails. Track record of driving efficiency, fostering collaboration, and staying ahead of industry trends.

EXPERIENCE

Product Designer / Design Systems Lead

Sep 2022 — Present

Pacific Programming & Tech Inc. · Vancouver, Canada

- Lead the design system team, owning two design systems end to end — Aurora for customer-facing products and Luminis for internal apps — including their management, maintenance, and governance
- Aurora: designed from scratch — identified the paradigms already living in the products, converted designers' decisions into a systematic language, and shipped it first as a Figma library, then as React components
- Aurora: scaled it into a multi-brand system — design tokens, production components, Storybook, a composition-patterns registry, and a reference website documenting tokens, theming, and patterns — with a white-label token pipeline (Figma → structured JSON → generated theme packages) consumed across React, Vue, and Razor stacks
- Luminis: built the internal-apps system as a shadcn/ui fork so teams and AI tools can build with it directly using familiar conventions, extended with complex application components like the DataView table and the app sidebar layout
- Made both systems agentic and AI-ready: machine-readable component contracts (props, variants, accessibility) with MCP retrieval, plus agent guardrails that keep AI-generated UI from drifting from production
- Crafted the design-to-development handover process — starter kits, office hours, and contribution guidelines adopted across design and engineering
- Led the design team on the redesign of a massive CRM application for a 700-agent call center, delivering a user-friendly product that met the center's operational needs
- Established accessibility tooling and guidelines, and used user-testing platforms and analytics to drive data-driven design decisions

Product Design Lead

Aug 2021 — Sep 2022

Lomio Travel · Istanbul, Türkiye

- Led the design team on a new travel-booking product end to end — from ideation to launch — in a highly competitive market
- Conducted 200+ interviews with potential users, refining the design solution based on their feedback
- Educated and guided the team toward consistent, scalable components, laying the groundwork for a design system launch post-release

User Experience Designer

Jan 2020 — Sep 2021

Türksat Satellite Communications · Istanbul, Türkiye

- Redesigned the four core websites of Turkey's leading satellite company around a newly redesigned brand identity, keeping core functionality intact
- Won 2nd place for best corporate website design 2020 (Altın Örümcek awards) with the Türksat corporate website, turksat.com.tr
- Kept the brand identity consistent across all product lines while improving the overall user experience

Design Manager

Jan 2018 — Sep 2021

Green Wing Co. W.L.L · Istanbul, Türkiye

- Managed and led a design team of 8 building e-commerce websites and a mobile app for a multi-brand fashion company — delivered on time, on budget, and to quality standards
- Leveraged user-behavior data from testing and analytics to improve the user experience and drive conversions

SKILLS

Design systems & governance

Design tokens & white labeling

Component contracts & documentation

AI-ready infrastructure (MCP, agent guardrails)

Figma & Code Connect

Accessibility (WCAG)

User research & analytics

Team leadership & education

CONFERENCES & AWARDS

- Into Design Systems conference — attended three years running (2024, 2025, 2026)
- 2nd place, best corporate website design 2020 — Altın Örümcek awards, for the Türksat corporate website (turksat.com.tr)
