

Sahand Anvari

Product Designer · Design Systems Lead

Vancouver, BC, Canada · 778-798-0435 · sahandanvari@gmail.com · linkedin.com/in/sahandanvari

SUMMARY

Product Designer with 5+ years of leadership building, scaling, and governing multi-brand design systems. Deep expertise in design tokens, component libraries, accessibility, and design-to-code workflows; currently focused on AI-ready design infrastructure — machine-readable component contracts, MCP retrieval, and agent guardrails that keep generated UI aligned with production. Track record of driving efficiency, educating teams, and shipping developer-friendly solutions.

CORE SKILLS

Design Systems & Governance · Design Tokens & Theming · Multi-brand / White-label Architecture · Component Libraries & Documentation · Figma (Libraries, Variables, Code Connect) · Storybook · Accessibility (WCAG 2.1 AA) · Design-to-Code Handoff · Developer Experience · AI-Ready Design Infrastructure (MCP, Agent Guardrails) · User Research & Usability Testing · Analytics & Data-Driven Design · Prototyping & Interaction Design · Information Architecture · Cross-Functional Leadership · Agile Product Delivery

EXPERIENCE

Product Designer / Design Systems Lead

Sep 2022 – Present

Pacific Programming & Tech Inc. — Vancouver, Canada

- Lead the design system team, owning two design systems end to end — Aurora for customer-facing products and Luminis for internal apps — including their governance, maintenance, and adoption.
- **Aurora:** designed from scratch — identified the paradigms already living in the products, converted designers' decisions into a systematic language, and shipped it first as a Figma library, then as React components.
- **Aurora:** scaled it into a multi-brand system — design tokens, production components, Storybook, a composition-patterns registry, and a reference website documenting tokens, theming, and patterns — with a white-label token pipeline (Figma → structured JSON → generated theme packages) consumed across React, Vue, and Razor stacks.
- **Luminis:** built the internal-apps system as a shadcn/ui fork so teams and AI tools can build with it directly using familiar conventions, extended with complex application components such as the DataView table and the app sidebar layout.
- Made both systems agentic and AI-ready: machine-readable component contracts (props, variants, accessibility) exposed through MCP retrieval, plus agent guardrails that prevent AI-generated UI from drifting from production.
- Crafted the design-to-development handover process — starter kits, office hours, and contribution guidelines — improving collaboration between designers and developers working with the system.
- Led the design team on the redesign of a massive CRM application for a 700-agent call center; established accessibility tooling and guidelines, and used user-testing platforms and analytics for data-driven design decisions.

Product Design Lead

Aug 2021 – Sep 2022

Lomio Travel — Istanbul, Türkiye

- Led the design team on a comprehensive travel-booking product end to end — from ideation to launch — delivering an innovative solution in a highly competitive market.
- Conducted 200+ interviews with potential users and refined the design solution based on their feedback.
- Educated and guided the team toward consistent, scalable components, laying the groundwork for a design system launch post-release.

User Experience Designer (Contract)

Jan 2020 – Sep 2021

Türksat Satellite Communications — Istanbul, Türkiye

- Redesigned the four core websites of Turkey's leading satellite company around a newly redesigned brand identity, ensuring consistency across all online channels while preserving core functionality.
- Won 2nd place for Best Corporate Website Design 2020 (Altın Örümcek Awards) with the Türksat corporate website, turksat.com.tr.

Design Manager

Jan 2018 – Sep 2021

Green Wing Co. W.L.L — Istanbul, Türkiye

- Managed and led a design team of 8 building e-commerce websites and a mobile app for a multi-brand fashion company — delivered on time, on budget, and to quality standards.
- Leveraged user-behavior data from user testing and analytics to improve the user experience and drive conversions.

CONFERENCES & AWARDS

- Into Design Systems conference — attended three years running (2024, 2025, 2026)
- 2nd place, Best Corporate Website Design 2020 — Altın Örümcek Awards, for the Türksat corporate website (turksat.com.tr)
